HELMET BOX

SHAKO manufacturing using a unique packaging design as the helmet box. Almost every competitor in the market have not consider much attention in their helmet packaging rather than use a simple covering box. SHAKO helmet box has added an additional colour and value for the helmet as it contains a 3D image of helmet, its key characteristics, safety message to the customer, etc. Sample design of SHAKO helmet box is as follows.

OUR USP

- Engineered shell with virgin reinforced ABS to give the highest strength with the lowest weight. (SHAKO use only virgin (100% pure ABS) material throughout the production as to maintain the strength and quality of the product)
- SHAKO has utilized the best engineering design to reduce the wind resistant and its shell comes with a high-density inner EPS liner to absorb shocks.
- The clear polycarbonate and scratch resistant visor of SHAKO helmet facilitates a clear road vision
- SHAKO consists with a comfortable and cool inner cushion lining which allows ventilation in providing the user a fantastic ride.
- The unique retention system of SHAKO prevents the helmet being rolling out from the user's head.
- The chin strap of SHAKO is made out of a high-quality seat belt material to make sure that the user is having a comfortable ride.
- SHAKO uses a High-quality paint and lacquer for better durability.

TARGET AUDIENCES

- Riders and Pillion riders of motorcycle and scooters who is looking for the highest quality, durability and the most affordable safest helmet.
